

NEW VENTURE™ 150 S BATTERY WELDER

**No long, heavy leads.
No tripping breakers.
Don't stop, just swap.**

250 hours a year. That's how much time you can save when your setup is practically nonexistent and you eliminate the need to walk back and forth to reset breakers. Sure, battery welding has been around for a while, but ours has a swappable battery engineered specifically for welding. The Venture 150 S. Lightweight and powerfully convenient.

Quick Specs

Applications	<ul style="list-style-type: none">• Mechanical contracting• Maintenance and repair• Mobile welding• HVAC
Process	Stick/TIG
Battery	400 Wh
Electrodes (1/8 7018)	8
TIG Arc Time	100A @ ~16 minutes 160A @ ~8.5 minutes
Charge Time	Standard: 0-95% in under 60 minutes Fast: 0-95% in under 30 minutes
Weight	26.5 lbs.
Output	DC Stick: 20-150A DC TIG: 10-160A
Stock Numbers	951000202: pkg. Venture 150 S with battery and charger 907888: Venture 150 S power source 301756: 400Wh Battery Pack 301755: Charger

Key Benefits

Battery in, power on, and job done.

Save Time

Faster setup and pack-up saves up to 250 hours annually — that's more time for welding

Compact Design

Light, convenient and easy to carry between jobsites

Engineered Specifically for Welding

Swappable battery packs so you can weld all day

Reliable Output

100% duty cycle at maximum output

Swappable Batteries Engineered for Welding

Lightweight and packed with power, the Venture 150 S battery welder allows you to be more nimble on the job. Less equipment to carry, more time to weld.
